- Django
- Express

### • Language

- English
- Spanish

### • Profile

From my first "Hello World" in my debut app, I was hooked on software dev. It's more than a job—it's a thrill to level up my skills and craft top-notch software. What began as a simple intro has blossomed into a passion that only gets more exciting with time. So yeah, software dev isn't just what I do; it's my jam and my passion.

### • Experience

**E-commerce app:**
- React-based e-commerce application designed to provide a seamless shopping experience

**Chat app:**
- a real-time chat application designed to connect you with friends and loved ones.

You can find all my projects on my github

### • Education

- Chemical Technician          EETP 449
